

Tannic acid Stain Remover

946

Cleaning agent for removing dark discoloration on oak wood.

Application range:

Water-based cleaning agent for removing dark discoloration from oak wood. Not suitable for smoked oak wood.

Technical qualities:

Removes dark discoloration from wood containing tannic acid, such as oak. Has a brightening effect on older, darkened wood surfaces.

Colour:

Colorless.

Full declaration:

Water, oxalic acid, non-ionic surfactants, polyaspartic acid. Surfactants are biodegradable according to detergent regulation no. 648/2004.

Application:

Shake before use. At high temperatures, the wood should be moistened. Avoid direct sunlight as far as possible. Apply a thin layer of Tannic Acid Stain Remover to the discolored area. Leave to work for about 15 minutes. Then rinse the surface thoroughly with clean water. In the case of stubborn stains, further treatment with the tannic acid stain remover may be necessary and the area can be treated with a care product, oil or wax once it is completely dry. After removing stubborn stains, a light sanding may be necessary before refinishing.

Container sizes and coverage:

Consumption depends on the type and degree of soiling.

Sizes	Coverage...*
0,25l	Depending on use

* Coverage per coat

Storage:

Store in a cool and frost-free place. Shelf life is at least 24 months if unopened.

Disposal:

Dispose of the product in accordance with local, official regulations. Do not allow to enter waste water. Waste code: EWC 070601

Cleaning:

Water.

Hazard statements:

Safety data sheet available on request.

Precautionary statements:

Keep out of reach of children.

UFI: 7VXW-A8QY-100Y-Y0M4
